Fund Risk Profile

Inception Date: 1 April 2011
 Fund Size: \$67.33 million
 Unit Price: 150.79 cents per unit
 Units in issue: 44,654,100
 Min. Investment: \$5,000
 Benchmark: 60% MSCI World Index; 20% JP Morgan Global Bond Index; 10% S&P Global REIT Index; 10% IMF Special Drawing Rights
 Registered: Guernsey
 Custodian: BNP Paribas Trust Company (Guernsey) Ltd
 Distribution: None

Fees:

Initial Charge: Up to 1%
 Annual Fund Fee: 1.34%

Total Expense Ratio (see explanatory notes for more info)

	Financial Year:	3 Year Rolling:
Total Expense Ratio (TER)	2.00%	1.97%
Transaction Costs (TC)	0.01%	0.01%
Total Investment Charges (TER+TC)	2.00%	1.98%

A Higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER may not necessarily be an accurate indication of future TER's. Transaction costs are a necessary cost in administering the Financial Product and impacts the Financial Product returns. It should not be considered in isolation as returns may be impacted by many other factors over time, including market returns, the type of financial product, the investment decisions of the investment manager and the TER.

COMMENTARY

Credo Capital Plc

The end of 2021 and the beginning of 2022 has proven to be a volatile period for risky assets, with global equities and global REITs seeing multiple reversals in fortune. It started with both falling around 3% by the end of November, then rallying 4.3% and 7.4% respectively during December, before paring those gains and finally ending the quarter 3.3% down. Global Bonds experienced a far smoother journey over the quarter, however they too ultimately ended the period down 3.3%, with currency effects detracting a further 0.2%.

Brooks Macdonald

The invasion of Ukraine by Russian forces has catalysed a broad fall in equity markets and investor sentiment. The human cost of the Ukraine conflict could be stark and extensive, making tough sanctions from NATO allies, and other countries globally, inevitable. Markets are already beginning to price in the inflationary consequences of the renewed surge in energy prices, particularly within continental Europe. The second order impacts of the next round of sanctions is unclear at this point however sanctions, which increase barriers to trade, by their nature are also inflationary. Today we will see how governments react and how markets expect the invasion of Ukraine to impact central bank thinking. In the meantime, our thoughts are with the people of Ukraine. The market volatility so far this year has not however been driven exclusively by geopolitical risks and was initially caused by near-term inflationary pressures proving to be higher and longer lasting than many, including us, expected. Responding to this inflationary pressure, central banks, including notably the Bank of England and the US Federal Reserve have in recent months communicated a greater willingness to taper and end asset purchase programmes as well as raise interest rates. Market expectations have moved aggressively to price in a rapid sequence of rate hikes over the course of this year. Whilst initially, this backdrop caused investors to reallocate from growth into value investment styles, lately, markets have started to see the risk that an aggressive rate hike cycle might threaten longer-term economic growth more broadly. We continue to judge inflationary pressures as primarily driven by factors that will fade as the year progresses. The pandemic has driven significant distortions to economies, with imbalances between supply and demand for goods and services, and pressure on supply chains globally. We see signs that these imbalances are starting to moderate, and they are expected to continue to do so over the coming months, albeit from elevated levels. We therefore expect that the current inflation pressures will start to ease. As such, we see a lower interest rate path, both in terms of pace and scale, than what is currently assumed by markets. In the months ahead, this should allow risk assets, in particular growth equities, to see some relative recovery in sentiment. Consistent with this view, we are maintaining our asset allocation strategy of balance between growth and value investment styles at the current time. While short-term market volatility has impacted the valuations of investor portfolios, we continue to see a longer-term constructive investing environment, with interest rates likely to remain low in absolute terms against an historical context, and a maintained preference for equities over bonds.

It is important to look through the heightened short-term market volatility, as we did during the Covid led volatility in the first quarter of 2020, and we must remind ourselves that any investment strategy is long term in nature. We have a robust Central Investment and Investment Research Process and have selected quality investments within our investment strategies, which will recover strongly once normality returns to the stock markets and that “time in the market” is more important than trying to “time the market”.

Collective Investment Schemes (CIS) are generally medium to long term investments. The value of the participatory interest may go up as well as down and past performance is not necessarily a guide to future performance. Performance disclosed in the fact sheets is applicable to the respective fund. Performance are calculated after management fees and other expenses. PTI Mutual Fund PCC does not provide a guarantee either with respect to the capital or the return of a portfolio. Actual investor performance may differ as a result of the investment date, any initial fee charged, the date of reinvestment and any withholding tax. Performance figures quoted are for the period ending 28 February 2022 based on a lump sum investment, fully invested for the period measured, using NAV prices which include fees and charges, excluding any initial fees, with income distributions, gross of withholding tax, reinvested on ex-dividend date. PTI Mutual Fund PCC Limited has the right to close the portfolio to new investors in order to manage it more efficiently in accordance with its mandate. CIS are traded at ruling prices and can engage in borrowing and scrip lending. The PTI Global Select Managers Opportunities Fund is jointly managed by Brooks MacDonald Asset Management (International) Limited, Licence Number 45742 and Credo Capital Plc, Licence Number 9757. There have been no breaches in the Fund during the reporting period. Subscription by institutional investors, or by investors deemed to be institutional investors by the Manager, may be permitted by invitation only. The terms of subscription by institutional investors will be concluded at time of invitation. Historic pricing is used. A schedule of fees and charges and maximum commissions is available on request from the company. Commissions and incentives may be paid and if so, would be included in the overall cost. The Fund may invest in portfolios of collective schemes that levy their own charges, which could result in a higher fee structure for the fund. A Fund of Funds portfolio will invest in portfolios that levy their own charges, which could result in a higher fee structure for the Fund of Funds. In both instances, the charges levied by the portfolios of collective investment schemes into which the Fund invests are reflected in the Total Expense Ratio. A portfolio can invest in foreign securities which may have exposure to potential constraints on liquidity and the repatriation of funds; macroeconomic risks; political risks; foreign exchange risks; tax risks, settlement risks; and potential limitations on the availability of market information.

EXPLANATORY NOTES

3 Year Rolling	1 October 2018 – 30 September 2021
Annualised	The compound annual growth rate over the performance period measured. Past performance is not indicative of future performance.
Financial Year	1 January – 31 December
Highest & Lowest Returns	Returns achieved over rolling one year periods since inception. Actual annual figures are available to the investor on request.
Percentage positive months	The percentage of calendar months in which the Fund produced a positive monthly return since inception.
Total Expense Ratio (TER)	The percentage of the value of the Financial Product incurred as expenses relating to the administration of the Financial Product.
Transaction Cost (TC)	The percentage of the value of the Financial Product incurred as costs related to the buying and selling of the assets underlying the Financial Product.
Total Investment Charges (TER + TC)	The percentage of the value of the product incurred as costs relating to the investment of the Financial Product.
