COMMENTARY

The *Personal Trust Equity Fund* maintains a long term thematic focus. It remains positioned to reflect ALSI sector weightings & to benefit from identified thematic impacts. In the short-term, the potential of further normalisation of interest rates on the back of further Fed rate hikes; simmering Tariff wars; potential Sovereign Debt downgrades & SA's continued poor fiscal metrics will influence the funds cash holdings. Although 2018 was a tough year for most equity markets, the conditions for a major bear market are not yet in place & we have seen a rebound in the market year to date. Although US National Economic Council Director Larry Kudlow stated on 28/02/19 there was "fantastic progress" in the US-China trade talks. The real issue remains around IP and this means that the trade war tension will likely persist in the background. Changes to portfolio weightings in the quarter were primarily a switch from an overweight Remgro position into Nedbank and Standard Bank. The cash holdings are predominantly retained in the Money Market, until the global market looks through current geo-political events; the yield curve inversion and irrational investor sentiment subsides. Thus, the fund retains a balance between Rand hedge & SA Inc. counters. This is reflected in YTD return ahead of the JSE All Share Index returns. The fund and the top ten holdings still reflect the investment philosophy which favours high quality, highly liquid companies with consistent long-term track records which are the guiding principles of the Investment Councils agreed investment process.

EXPLANATORY NOTES

3 Year Rolling	1 January 2016 – 31 December 2018
12 month historic yield	All income declared during the previous 12 months, gross of any withholding tax, as a percentage of the NAV price on the date of the MDD.
Annualised	The compound annual growth rate over the performance period measured. Past performance is not indicative of future performance.
Cumulative Performance graph	This graph is for illustrative purposes only. It depicts how an initial lump sum investment of R1,000 (for example) placed at inception of the fund has changed over time, taking ongoing fees into account (excluding any initial fees charged), with all distributions reinvested on reinvestment date, prior to the deduction of any withholding taxes.
Financial Year	1 January 2017 – 31 December 2017
Highest & Lowest Returns	Returns achieved over rolling one year periods since inception. Actual annual figures are available to the investor on request.
Maximum Drawdown	Maximum percentage decline over any period. Drawdown is calculated on the total return of the Fund/benchmark.
Percentage positive months	The percentage of calendar months in which the Fund produced a positive monthly return since inception.
Total Expense Ratio (TER)	The percentage of the value of the Financial Product incurred as expenses relating to the administration of the Financial Product.
Transaction Cost (TC)	The percentage of the value of the Financial Product incurred as costs related to the buying and selling of the assets underlying the Financial Product.
Total Investment Charges (TER + TC)	The percentage of the value of the product incurred as costs relating to the investment of the Financial Product.

Collective Investment Schemes (CIS) are generally medium to long term investments. The value of the participatory interest may go up as well as down and past performance is not necessarily a guide to future performance. Performance disclosed in the fact sheets is applicable to the respective fund. Performance figures include income distributions, prior to deduction of withholding taxes and are calculated after management fees. Personal Trust International Management Company (Pty) Limited does not provide a guarantee either with respect to the capital or the return of a portfolio. Actual investor performance may differ as a result of the investment date, any initial fee charged, the date of reinvestment and any withholding tax. Performance figures quoted are from Profile Data for the period ending 28 February 2019 based on a lump sum investment, using NAV prices which include fees and charges, excluding any initial fees, with income distributions reinvested on ex-dividend date. Personal Trust International Management Company (Pty) Ltd has the right to close the portfolio to new investors in order to manage it more efficiently in accordance with its mandate. CIS are traded at ruling prices and can engage in borrowing and scrip lending. There have been no breaches in the fund during the reporting period. Subscription by institutional investors, or by investors deemed to be institutional investors by the Manager, may be permitted by invitation only. The terms of subscription by institutional investors will be concluded at time of invitation. Historic pricing is used. A schedule of fees and charges and maximum commissions is available on request from the company. Commissions and incentives may be paid and if so, would be included in the overall cost. The Fund may invest in portfolios of collective schemes that levy their own charges, which could result in a higher fee structure for the Fund. A Fund of Funds portfolio will invest in portfolios that levy their own charges, which could result in a higher fee structure for the Fund of Funds. In both instances, the charges levied by the portfolios of collective investment schemes into which the Fund invests are reflected in the Total Expense Ratio. A portfolio can invest in foreign securities which may have exposure to potential constraints on liquidity and the repatriation of funds; macroeconomic risks; political risks; foreign exchange risks; tax risks, settlement risks; and potential limitations on the availability of market information. A Higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER may not necessarily be an accurate indication of future TER's. Transaction costs are a necessary cost in administering the Financial Product and impacts the Financial Product returns. It should not be considered in isolation as returns may be impacted by many other factors over time, including market returns, the type of financial product, the investment decisions of the investment manager and the TER.
