Collective Investment Schemes (CIS) are generally medium to long term investments. The value of the participatory interest may go up as well as down and past performance is not necessarily a guide to future performance. Performance disclosed in the fact sheets is applicable to the respective fund. Performance figures include income distributions, prior to deduction of withholding taxes and are calculated after management fees. Personal Trust International Management Company (Pty) Limited does not provide a guarantee either with respect to the capital or the return of a portfolio. Actual investor performance may differ as a result of the investment date, any initial fee charged, the date of reinvestment and any withholding tax. Performance figures quoted are from Morningstar for the period ending 31 March 2021 based on a lump sum investment, fully invested for the period measured, using NAV prices which include fees and charges, excluding any initial fees, with income distributions, gross of withholding tax, reinvested on ex-dividend date. Personal Trust International Management Company (Pty) Ltd has the right to close the portfolio to new investors in order to manage it more efficiently in accordance with its mandate. CIS are traded at ruling prices and can engage in borrowing and scrip lending. A fund of fund portfolio only invests in other Collective Investment Scheme portfolios which levy their own charges, which could result in a higher fee structure for these funds. There have been no breaches in the fund during the reporting period. Subscription by institutional investors, or by investors deemed to be institutional investors by the Manager, may be permitted by invitation only. The terms of subscription by institutional investors will be concluded at time of invitation. Historic pricing is used. A schedule of fees and charges and maximum commissions is available on request from the company. Commissions and incentives may be paid and if so, would be included in the overall cost. The Fund may invest in portfolios of collective schemes that levy their own charges, which could result in a higher fee structure for the Fund. A Fund of Funds portfolio will invest in other Collective Investment Scheme portfolios that levy their own charges, which could result in a higher fee structure for the Fund of Funds. In both instances, the charges levied by the portfolios of collective investment schemes into which the Fund invests are reflected in the Total Expense Ratio. A portfolio can invest in foreign securities which may have exposure to potential constraints on liquidity and the repatriation of funds; macroeconomic risks; political risks; foreign exchange risks; tax risks, settlement risks; and potential limitations on the availability of market information.
